

SAFETY MEASURES FOR THE PREVENTION OF NOVEL CORONAVIRUS INFECTIONS

HOTEL BLOEMEN initiatives

HOTEL BLOEMEN strictly enforces COVID-19 epidemic prevention measures and sets sanitary standards. We will endeavor to achieve safety to protect the health of you and the community.

{Details of hygiene enhancement}

★Effort for employees

All employees before starting the work will take basic precautions such as checking body temperature, washing hands, disinfecting chemicals and wearing masks as a precautionary measure.

All employees will be instructed in detail to wash their hands properly every hour (when entering and after work, after rest, after cleaning ...).

★Public Space

We are increasing the available of alcohol disinfectant solution in the lobby(at the entrance and in front of elevator) and all the guest room floor.

For the purpose of preventing splash and other air-transmission routes, we have installed partitions with protective acrylic boards at the front desk counters.

Alcohol disinfection is conducted continuously on areas which are often touched by the public and others(such as front desk counters, telephone, door knobs, elevator buttons, automatic vending machines, etc)

★Housekeeping

The ventilation system is activated during the cleaning of your room.

Alcohol disinfection is conducted mainly on parts which are often touched by the guest(such as light switch, door knobs, TV remote control, etc.)

We sincerely apologize for those who have a fever above 37.5°C (99.5°F) or who are not feeling well, but please refrain from lodging.

*The standard of 37.5°C is based on national administrative guidelines.
